NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

New England Life Insurance Company (the “Company”) presents the accompanying financial statements on the basis of accounting practices prescribed or permitted (“MA SAP”) by the Commonwealth of Massachusetts (“Massachusetts”) Division of Insurance (the “Division”).

The Division recognizes only the statutory accounting practices prescribed or permitted by Massachusetts in determining and reporting the financial condition and results of operations of an insurance company, in determining its solvency under the Massachusetts Insurance Law. In 2001, the National Association of Insurance Commissioners (“NAIC”) *Accounting Practices and Procedures Manual* (“NAIC SAP”) was adopted as a component of MA SAP.

Massachusetts has adopted certain prescribed accounting practices that differ from those found in NAIC SAP, none of which affect the financial statements of the Company. A reconciliation of the Company’s net income and capital and surplus between MA SAP and NAIC SAP is as follows:

	SSAP Number ⁽¹⁾	Financial Statement Page	Financial Statement Line Number	For the Six Months Ended June 30, 2026	For the Year Ended December 31, 2025

⁽¹⁾ Statement of Statutory Accounting Principles (“SSAP”)

B. No significant change.

C. Accounting Policy

- (1) No significant change.
- (2) Bonds not backed by other loans are generally stated at amortized cost unless they have a NAIC rating designation of 6, which are stated at the lower of amortized cost or fair value. Bonds not backed by other loans are amortized using the constant yield method.
- (3-5) No significant change.
- (6) Asset-backed securities (“ABS”), included in bonds, are generally stated at amortized cost using the scientific method unless they have a NAIC rating designation of 6, which are stated at the lower of amortized cost or fair value. Amortization of the discount or premium from the purchase of these securities considers the estimated timing and amount of prepayments of the underlying mortgage loans. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For credit-sensitive ABS, certain prepayment-sensitive bonds (e.g., interest-only securities) and securities that have experienced an other-than-temporary impairment (“OTTI”), the effective yield is recalculated on a prospective basis. For all other ABS, the effective yield is recalculated on a retrospective basis.

For certain ABS, both an initial and final NAIC designation is determined on a security-by-security basis based on a range of values published by the NAIC. The final designation calculation compares this carrying value with a range of values, resulting in a final NAIC designation reported herein, which is used for all other accounting and reporting purposes. For ABS which are not modeled, the NAIC relies on NAIC Credit Rating Provider (“CRP”) ratings to determine the NAIC designation.

- (7-13) No significant change.

D. Going Concern

Management does not have any substantial doubt about the Company’s ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

No significant change.

3. Business Combinations and Goodwill

No significant change.

NOTES TO THE FINANCIAL STATEMENTS

4. Discontinued Operations

No significant change.

5. Investments

A-C. No significant change.

D. Asset-backed Securities

- (1) Prepayment assumptions were obtained from published broker dealer values and internal estimates.
- (2) a. The Company did not recognize any OTTI on the basis of the intent to sell during the six months ended June 30, 2026.
- b. The Company did not recognize any OTTI on the basis of the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis during the six months ended June 30, 2026.
- c. Impairments where the present value of cash flows expected to be collected is less than the amortized cost basis of the security are shown in Note 5D(3).
- (3) The asset-backed securities for which an OTTI has been recognized during the six months ended June 30, 2026, measured as the difference between amortized cost and estimated present value of projected future cash flows to be collected, were as follows:

CUSIP	Book/Adjusted Carrying Value Amortized Cost Before Current Period OTTI	Present Value of Projected Cash Flows	Recognized OTTI	Amortized Cost after OTTI	Estimated Fair Value at Time of OTTI	Date of Financial Statement Where Reported
362256AC3	\$ 948,887	\$ 932,500	\$ 16,387	\$ 932,500	\$ 932,491	3/31/2026
362256AC3	\$ 917,919	\$ 894,987	22,932	\$ 894,987	\$ 894,994	6/30/2026
Total			<u>\$ 39,319</u>			

- (4) At June 30, 2026, the estimated fair value and gross unrealized losses for asset-backed securities, aggregated by length of time the securities have been in a continuous loss position were as follows:
- a. The aggregate amount of unrealized losses:
- | | |
|------------------------|--------------|
| 1. Less than 12 Months | \$ 341,387 |
| 2. 12 Months or Longer | \$ 8,642,749 |
- b. The aggregate related fair value of securities with unrealized losses:
- | | |
|------------------------|---------------|
| 1. Less than 12 Months | \$ 43,810,729 |
| 2. 12 Months or Longer | \$ 74,319,252 |
- (5) The Company performs a regular evaluation, on a security-by-security basis, of its securities holdings in accordance with its OTTI policy in order to evaluate whether such investments are other than temporarily impaired. Management considers a wide range of factors about the security issuer and uses its best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Factors considered include fundamentals of the industry and geographic area in which the security issuer operates, as well as overall macroeconomic conditions.

Projected future cash flows are estimated using assumptions derived from management’s best estimates of likely scenario-based outcomes after giving consideration to a variety of variables that include, but are not limited to:

- i. general payment terms of the security;
- ii. the likelihood that the issuer can service the scheduled interest and principal payments;
- iii. the quality and amount of any credit enhancements;
- iv. the security’s position within the capital structure of the issuer;
- v. possible corporate restructurings or asset sales by the issuer; and
- vi. changes to the rating of the security or the issuer by rating agencies.

Additional considerations are made when assessing the unique features that apply to certain asset-backed securities including, but are not limited to:

- i. the quality of underlying collateral;
- ii. expected prepayment speeds;
- iii. current and forecasted loss severity;
- iv. consideration of the payment terms of the underlying assets backing the security; and
- v. the payment priority within the tranche structure of the security.

NOTES TO THE FINANCIAL STATEMENTS

For asset-backed securities in an unrealized loss position as summarized in the immediately preceding table, the Company does not have the intent to sell the securities, believes it has the intent and ability to retain the security for a period of time sufficient to recover the carrying value of the security and based on the cash flow modeling and other considerations as described above, believes these securities are not other than temporarily impaired.

E-I. Dollar Repurchase, Securities Lending, Repurchase and Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing and as a Sale

The Company did not have any dollar repurchase, securities lending, repurchase or reverse repurchase agreements transactions accounted for as secured borrowing or as a sale during the six months ended June 30, 2026.

J-K. No significant change.

16. Information about Financial Instruments with Off-Balance Sheet Risk and Financial Instruments with Concentrations of Credit Risk

(1) The table below summarizes the notional amount of the Company’s financial instruments (derivatives that are designated as effective hedging instruments and derivatives used in replications) with off-balance sheet credit risk at:

	Assets		Liabilities	
	June 30, 2026	December 31, 2025	June 30, 2026	December 31, 2025
Swaps	\$ 11,594,250	\$ 10,318,647	\$ —	\$ —

(2) No significant change.

(3) The Company may be exposed to credit-related losses in the event of nonperformance by counterparties to derivatives. Generally, the current credit exposure of the Company’s derivatives is limited to the net positive estimated fair value of derivatives at the reporting date after taking into consideration the existence of master netting or similar agreements and any collateral received pursuant to such agreements.

The Company manages its credit risk related to derivatives by entering into transactions with creditworthy counterparties and establishing and monitoring exposure limits. The Company’s OTC-bilateral derivative transactions are governed by International Swaps and Derivatives Association, Inc. (“ISDA”) Master Agreements which provide for legally enforceable set-off and close-out netting of exposures to specific counterparties in the event of early termination of a transaction, which includes, but is not limited to, events of default and bankruptcy. In the event of an early termination, the Company is permitted to set-off receivables from the counterparty against payables to the same counterparty arising out of all included transactions. All of the Company's ISDA Master Agreements also include Credit Support Annex provisions which may require both the pledging and accepting of collateral in connection with its OTC-bilateral derivatives.

Off-balance sheet credit exposure is the excess of positive estimated fair value over positive book/adjusted carrying value for the Company’s highly effective hedges and derivatives used in replications at the reporting date. All collateral received from counterparties to mitigate credit-related losses is deemed worthless for the purpose of calculating the Company’s off-balance sheet credit exposure. The off-balance sheet credit exposure of the Company’s foreign currency swaps was \$26,981 and \$62,857 at June 30, 2026 and December 31, 2025, respectively.

(4) At June 30, 2026 and December 31, 2025, the estimated fair value of collateral consisting of various securities received by the Company on its OTC-bilateral derivatives as variation margin was \$823,501 and \$837,065, respectively.

- (3) Transfers between levels are assumed to occur at the beginning of the annual reporting period.
- (4) Assets and Liabilities Measured and Reported at Estimated Fair Value at Reporting Date.

NOTES TO THE FINANCIAL STATEMENTS

When developing estimated fair values, the Company considers three broad valuation techniques: (i) the market approach, (ii) the income approach, and (iii) the cost approach. The Company determines the most appropriate valuation technique to use, given what is being measured and the availability of sufficient inputs, giving priority to observable inputs. The Company categorizes its assets and liabilities measured at estimated fair value into a three-level hierarchy, based on the significant input with the lowest level in its valuation. The input levels are as follows:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar assets or liabilities other than quoted prices in Level 1, quoted prices in markets that are not active, or other significant inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets or liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

Determination of Fair Value

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In most cases, the exit price and the transaction (or entry) price will be the same at initial recognition.

Separate Account Assets: For separate account assets classified as Level 2 assets (excluding derivatives), estimated fair values are determined using either a market or income approach. The estimated fair value is determined using third-party commercial pricing services, with the primary input being quoted securitization market price determined principally by independent pricing services using observable inputs or quoted prices or reported net asset value ("NAV") provided by the fund managers.

Derivatives: For OTC-bilateral derivatives classified as Level 2 assets or liabilities, estimated fair values are determined using the income approach. Valuations of non-option-based derivatives utilize present value techniques.

The significant inputs to the pricing models for most OTC-bilateral derivatives are inputs that are observable in the market or can be derived principally from, or corroborated by, observable market data.

Most inputs for OTC-bilateral derivatives are mid-market inputs but, in certain cases, liquidity adjustments are made when they are deemed more representative of exit value. Market liquidity, as well as the use of different methodologies, assumptions and inputs, may have a material effect on the estimated fair values of the Company's derivatives and could materially affect the net change in capital and surplus.

The credit risk of both the counterparty and the Company are considered in determining the estimated fair value for all OTC-bilateral derivatives, and any potential credit adjustment is based on the net exposure by counterparty after taking into account the effects of netting agreements and collateral arrangements. The Company values its OTC-bilateral derivatives using standard swap curves which may include a spread to the risk-free rate, depending upon specific collateral arrangements. This credit spread is appropriate for those parties that execute trades at pricing levels consistent with similar collateral arrangements. As the Company and its significant derivative counterparties generally execute trades at such pricing levels and hold sufficient collateral, additional credit risk adjustments are not currently required in the valuation process. The Company's ability to consistently execute at such pricing levels is in part due to the netting agreements and collateral arrangements that are in place with all of its significant derivative counterparties. An evaluation of the requirement to make additional credit risk adjustments is performed by the Company each reporting period.

- B. The Company provides additional fair value information in Notes 1, 5, and 16.

⁽¹⁾ Classification of derivatives is based on each derivative’s positive (asset) or negative (liability) book/adjusted carrying value, which equals the net admitted assets and liabilities.

Assets and Liabilities

See “A(4) - Assets and Liabilities Measured and Reported at Estimated Fair Value at Reporting Date” above for a description of the valuation technique(s) and the inputs used in the fair value measurement for Level 2 assets and liabilities measured and reported at fair value. Incrementally, assets and liabilities not carried at estimated fair value at the reporting period are described below.

Bonds, Cash, Cash Equivalents and Short-term Investments

When available, the estimated fair value for bonds, cash equivalents and short-term investments are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1, are the most liquid of the Company’s securities holdings and valuation of these securities does not involve management’s judgment.

The estimated fair value for cash approximates carrying value and is classified as Level 1 given the nature of cash.

For bonds, cash equivalents and short-term investments classified as Level 2 assets, estimated fair values are determined using an income approach. The estimated fair value is determined using third-party commercial pricing services, with the primary inputs being quoted prices in markets that are not active, benchmark yields, spreads off benchmark yields, new issuances, issuer rating, trades of identical or comparable securities, or duration for Level 2 assets. Privately-placed securities are valued using the additional key inputs: market yield curve, call provisions, observable prices and spreads for similar public or private securities that incorporate the credit quality and industry sector of the issuer, and delta spread adjustments to reflect specific credit-related issues.

NOTES TO THE FINANCIAL STATEMENTS

The estimated fair value for preferred stock is determined using third-party commercial pricing services, with the primary input being quoted prices in markets that are not active. Generally, these investments are classified in Level 2 or Level 3. Preferred stock valued using significant observable inputs are classified in Level 2 and those valued using significant unobservable inputs are classified in Level 3.

For bonds classified as Level 3 assets, estimated fair values are determined using a market approach. The estimated fair value is determined using matrix pricing or consensus pricing, with the primary inputs being quoted and offered prices.

Mortgage Loans

For mortgage loans, estimated fair value is primarily determined by estimating expected future cash flows and discounting them using current interest rates for similar mortgage loans with similar credit risk, or is determined from pricing for similar mortgage loans. The estimated fair values for impaired mortgage loans are principally obtained by estimating the fair value of the underlying collateral using market standard appraisal and valuation methods. Mortgage loans valued using significant unobservable inputs are classified in Level 3.

Contract Loans

The estimated fair value for contract loans with variable interest rates approximates carrying value due to the absence of borrower credit risk and the short time period between interest rate resets, using observable inputs and is classified as Level 2. For contract loans with fixed interest rates, estimated fair values are determined using a discounted cash flow model applied to groups of similar contract loans determined based on the nature of the underlying insurance liabilities, using unobservable inputs and is classified in Level 3.

Other Invested Assets

The estimated fair value of other invested assets is determined using the methodologies as described in the above sections titled “Bonds, Stocks, Cash, Cash Equivalents and Short-term Investments”, based on the nature of the investment. Excluded from the disclosure are those other invested assets that are not considered to be financial instruments subject to this disclosure including investments carried on the equity method.

Derivatives

For Level 2 assets not carried at estimated fair value at the reporting period, the estimated fair value is determined using the methodologies described in the above section titled “*Derivatives*.”

Investment Income Due and Accrued

The estimated fair value of investment income due and accrued approximates carrying value due as this financial instrument is short-term in nature and the Company believes there is minimal risk of material changes in interest rates or the credit of the issuer. These amounts are generally classified as Level 2.

Investment Contracts Included in Liability for Deposit-Type Contracts

The fair value of investment contracts included in the liability for deposit-type contracts is estimated by discounting best estimate future cash flows based on assumptions that market participants would use in pricing such liabilities, with consideration of the Company’s non-performance risk (own-credit risk) not reflected in the fair value calculation. The assumptions used in estimating these fair values are based in part on unobservable inputs classified in Level 3.

Borrowed Money

The estimated fair value for borrowed money (including interest thereon) approximates carrying value due to the short-term maturities of these instruments. The amounts are classified in Level 2.

Payable for Collateral Received

The estimated fair value of amounts payable for collateral received approximates carrying value as these obligations are short-term in nature. These amounts are generally classified in Level 2.

Separate Accounts

Investment contracts included in Separate Account liabilities represent those balances due to policyholders under contracts that are classified as investment contracts. The carrying value of these Separate Account liabilities, which represents an equivalent summary total of the Separate Account assets supporting these liabilities, approximates the estimated fair value. These investment contracts are classified as Level 2 to correspond with the Separate Account assets backing the investment contracts.

The difference between the estimated fair value of investment contracts included in Separate Account liabilities in the table above and the total recognized in the Statutory Statements of Assets, Liabilities, Surplus and Other Funds represents amounts due under contracts that are accounted for as insurance contracts.

A-B. No significant change.

C. Other Disclosures

On November 6, 2025, Brighthouse Financial entered into an Agreement and Plan of Merger (the “Merger Agreement”) with Aquarian Holdings VI L.P., a Delaware limited partnership (“Aquarian Parent”), Aquarian Beacon Merger Sub Inc., a Delaware corporation and an indirect wholly-owned subsidiary of Aquarian Parent (“Merger Sub”), and Aquarian Holdings LLC, a Delaware limited liability company, solely for the purpose of certain provisions, pursuant to which, at the closing of the transactions contemplated by the Merger Agreement, Merger Sub will merge with and into Brighthouse Financial, with Brighthouse Financial surviving as a wholly-owned subsidiary of Aquarian Parent (the “Merger”).

The Merger Agreement was adopted by stockholders at the Brighthouse Financial special meeting held on February 12, 2026, and the applicable waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, as amended, has expired. On May 19, 2026, the Financial Industry Regulatory Authority approved the change of control of Brighthouse Securities, LLC. In addition, on June 18, 2026, the Committee on Foreign Investment in the United States informed the parties that it had concluded its review and that there were no unresolved national security concerns.

However, the completion of the Merger remains subject to the receipt of insurance regulatory approvals in Delaware, New York and Massachusetts. All other conditions to the closing of the Merger have been satisfied or waived (other than those conditions that, by their terms, are to be satisfied at the closing and are capable of being satisfied at the closing). Accordingly, if the Merger has not closed by September 6, 2026, because the remaining insurance regulatory approvals have not yet been obtained, the Merger Agreement will be automatically extended to December 6, 2026. The Merger is expected to close in 2026.

D-J. No significant change.

Reserves remaining for prior years are now \$2,479,992 as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been a \$293,477 favorable prior-year development from December 31, 2025 to June 30, 2026. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims.
