NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

New England Life Insurance Company (the “Company”) presents the accompanying financial statements on the basis of accounting practices prescribed or permitted (“MA SAP”) by the Commonwealth of Massachusetts (“Massachusetts”) Division of Insurance (the “Division”).

The Division recognizes only the statutory accounting practices prescribed or permitted by Massachusetts in determining and reporting the financial condition and results of operations of an insurance company, in determining its solvency under the Massachusetts Insurance Law. In 2001, the National Association of Insurance Commissioners (“NAIC”) *Accounting Practices and Procedures Manual* (“NAIC SAP”) was adopted as a component of MA SAP.

Massachusetts has adopted certain prescribed accounting practices that differ from those found in NAIC SAP, none of which affect the financial statements of the Company. A reconciliation of the Company’s net income and capital and surplus between MA SAP and NAIC SAP is as follows:

	SSAP Number ⁽¹⁾	Financial Statement Page	Financial Statement Line Number	For the Three Months Ended March 31, 2025	For the Year Ended December 31, 2024
Net income, MA SAP				\$ 20,302,836	\$ 65,482,610

⁽¹⁾ Statement of Statutory Accounting Principles (“SSAP”)

B. No significant change.

C. Accounting Policy

(1) No significant change.

(2) Bonds not backed by other loans are generally stated at amortized cost unless they have a NAIC rating designation of 6, which are stated at the lower of amortized cost or fair value. Bonds not backed by other loans are amortized using the constant yield method.

(3-5) No significant change.

(6) Asset backed securities are stated at either amortized cost or the lower of amortized cost or fair market value. Amortized cost is determined using the interest method and includes anticipated prepayments. The retrospective adjustment method is used to determine the amortized cost for securities that are of high credit quality. For all other securities, the prospective adjustments methodology is utilized, including interest-only securities and securities that have experienced an other-than-temporary impairment (“OTTI”).

(7-13) No significant change.

D. Going Concern

Management does not have any substantial doubt about the Company’s ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

Accounting Changes

On August 13, 2023, a new principles-based definition of a bond was adopted under SSAP No. 26, which became effective January 1, 2025. Under the new definition, securities were classified as either issuer credit obligations within the scope of SSAP No. 26 or asset-backed securities within the scope of SSAP No. 43. Securities that did not meet the principles-based bond definition were classified in accordance with the SSAP that addressed a security’s specific investment structure.

The new classification guidance was required to be applied to all securities as of the effective date, with reclassifications treated as disposals and acquisitions in the financial statements and related investment schedules. The Company adopted the new principles-based bond definition and followed the special transition guidance in SSAP No. 26. The adoption resulted in reclassification and reporting changes for certain investments. For additional details on the impact of this adoption, see Note 21.

Correction of Errors

The Company had no correction of errors during the three months ended March 31, 2025.

NOTES TO THE FINANCIAL STATEMENTS

3. Business Combinations and Goodwill

No significant change.

4. Discontinued Operations

No significant change.

5. Investments

A-C. No significant change.

D. Loan-backed Securities

- (1) Prepayment assumptions were obtained from published broker dealer values and internal estimates.
- (2)
 - a. The Company did not recognize any OTTI on the basis of the intent to sell during the three months ended March 31, 2025.
 - b. The Company did not recognize any OTTI on the basis of the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis during the three months ended March 31, 2025.
 - c. Impairments where the present value of cash flows expected to be collected is less than the amortized cost basis of the security are shown in Note 5D(3).
- (3) As of March 31, 2025, the Company has not recognized any OTTI on its loan-backed securities based on cash flow analysis.
- (4) At March 31, 2025, the estimated fair value and gross unrealized losses for loan-backed securities, aggregated by length of time the securities have been in a continuous loss position were as follows:
 - a. The aggregate amount of unrealized losses:

1. Less than 12 Months	\$	34,164
2. 12 Months or Longer	\$	10,522,182
 - b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months	\$	2,434,589
2. 12 Months or Longer	\$	82,881,982
- (5) The Company performs a regular evaluation, on a security-by-security basis, of its securities holdings in accordance with its OTTI policy in order to evaluate whether such investments are other than temporarily impaired. Management considers a wide range of factors about the security issuer and uses its best judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Factors considered include fundamentals of the industry and geographic area in which the security issuer operates, as well as overall macroeconomic conditions. Projected future cash flows are estimated using assumptions derived from management's best estimates of likely scenario-based outcomes after giving consideration to a variety of variables that include, but are not limited to: (i) general payment terms of the security; (ii) the likelihood that the issuer can service the scheduled interest and principal payments; (iii) the quality and amount of any credit enhancements; (iv) the security's position within the capital structure of the issuer; (v) possible corporate restructurings or asset sales by the issuer; and (vi) changes to the rating of the security or the issuer by rating agencies. Additional considerations are made when assessing the unique features that apply to certain loan-backed securities including, but are not limited to: (i) the quality of underlying collateral; (ii) expected prepayment speeds; (iii) current and forecasted loss severity; (iv) consideration of the payment terms of the underlying assets backing the security; and (v) the payment priority within the tranche structure of the security. For loan-backed securities in an unrealized loss position as summarized in the immediately preceding table, the Company does not have the intent to sell the securities, believes it has the intent and ability to retain the security for a period of time sufficient to recover the carrying value of the security and based on the cash flow modeling and other considerations as described above, believes these securities are not other than temporarily impaired.

E-I. Dollar Repurchase, Securities Lending, Repurchase and Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing and as a Sale

The Company did not have any dollar repurchase, securities lending, repurchase or reverse repurchase agreements transactions accounted for as secured borrowing or as a sale during the three months ended March 31, 2025.

J-L. No significant change.

3 Admitted	<u>\$ 16,071,558</u>

D-E. No significant change.

8. Derivative Instruments

As of March 31, 2025, there were no significant changes in the Company's derivative policy or investments other than those described below.

Credit Risk

The Company enters into various collateral arrangements, which may require both the pledging and accepting of collateral in connection with its derivatives.

As of March 31, 2025 and December 31, 2024, the Company did not have any collateral pledged in connection with its over-the-counter ("OTC") derivatives.

The table below summarizes the collateral received by the Company in connection with its OTC derivatives at:

	<u>Cash ⁽¹⁾</u>		<u>Securities ⁽²⁾</u>		<u>Total</u>	
	<u>March 31, 2025</u>	<u>December 31, 2024</u>	<u>March 31, 2025</u>	<u>December 31, 2024</u>	<u>March 31, 2025</u>	<u>December 31, 2024</u>
Variation Margin:

16. Information about Financial Instruments with Off-Balance Sheet Risk and Financial Instruments with Concentrations of Credit Risk

(1) The table below summarizes the notional amount of the Company's financial instruments (derivatives that are designated as effective hedging instruments and derivatives used in replications) with off-balance sheet credit risk at:

	Assets		Liabilities	
	March 31, 2025	December 31, 2024	March 31, 2025	December 31, 2024
Swaps	\$ 10,168,500	\$ 8,152,350	\$ —	\$ —

(2) No significant change.

(3) The Company may be exposed to credit-related losses in the event of nonperformance by counterparties to derivatives. Generally, the current credit exposure of the Company's derivatives is limited to the net positive estimated fair value of derivatives at the reporting date after taking into consideration the existence of master netting or similar agreements and any collateral received pursuant to such agreements.

The Company manages its credit risk related to derivatives by entering into transactions with creditworthy counterparties and establishing and monitoring exposure limits. The Company's OTC-bilateral derivative transactions are governed by International Swaps and Derivatives Association, Inc. ("ISDA") Master Agreements which provide

NOTES TO THE FINANCIAL STATEMENTS

for legally enforceable set-off and close-out netting of exposures to specific counterparties in the event of early termination of a transaction, which includes, but is not limited to, events of default and bankruptcy. In the event of an early termination, the Company is permitted to set-off receivables from the counterparty against payables to the same counterparty arising out of all included transactions. All of the Company's ISDA Master Agreements also include Credit Support Annex provisions which may require both the pledging and accepting of collateral in connection with its OTC-bilateral derivatives.

Off-balance sheet credit exposure is the excess of positive estimated fair value over positive book/adjusted carrying value for the Company's highly effective hedges and derivatives used in replications at the reporting date. All collateral received from counterparties to mitigate credit-related losses is deemed worthless for the purpose of calculating the Company's off-balance sheet credit exposure. The off-balance sheet credit exposure of the Company's foreign currency swaps was \$256,323 and \$141,447 at March 31, 2025 and December 31, 2024, respectively.

- (4) At March 31, 2025 and December 31, 2024, the estimated fair value of collateral consisting of various securities received by the Company on its OTC-bilateral derivatives as variation margin was \$810,814 and \$811,305, respectively.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities**A. Transfers of Receivables Reported as Sales**

No significant change.

B. Transfer and Servicing of Financial Assets

The Company did not participate in the transfer or servicing of financial assets during the three months ended March 31, 2025.

C. Wash Sales

- (1) In the course of the Company's asset management, securities are not sold and reacquired within 30 days of the sale date to enhance the Company's yield on its investment portfolio. There may be occasional isolated incidents where wash sales occur.
- (2) The Company had no wash sales with an NAIC designation 3 or below or unrated securities during the quarter ended March 31, 2025.

18. Gain or Loss to the Reporting Entity from Uninsured Plans and the Uninsured Portion of Partially Insured Plans

No significant change.

19. Direct Premium Written/Produced by Managing General Agents/Third Party Administrators

No significant change.

20. Fair Value Information

- A. (1) Assets and Liabilities Measured and Reported at Estimated Fair Value at Reporting Date.

Hierarchy Table

The following table provides information about financial assets and liabilities measured and reported at estimated fair value at:

	March 31, 2025			
	Fair Value Measurements at Reporting Date Using			Total

Total assets	<u>\$ —</u>	<u>\$ 6,274,818,630</u>	<u>\$ —</u>	<u>\$ 6,274,818,630</u>

- (1) Derivative assets and derivative liabilities presented in the table above represent only those derivatives that are carried at estimated fair value. Accordingly, the amounts above exclude highly effective derivatives carried at amortized cost.
- (2) Separate Account assets are subject to General Account claims only to the extent that the value of such assets exceeds the Separate Account liabilities. Investments (stated generally at estimated fair value) and liabilities of the Separate Accounts are reported separately as assets and liabilities.

Transfers between Levels 1 and 2

During the quarter ended March 31, 2025, transfers between Levels 1 and 2 were not significant. Transfers between levels are assumed to occur at the beginning of the annual period.

- (2) Assets and Liabilities Measured and Reported at Estimated Fair Value at Reporting Date

Rollforward Table – Level 3 Assets and Liabilities

There were no assets and liabilities measured and reported at estimated fair value using significant unobservable (Level 3) inputs for the quarter ended March 31, 2025.

Transfers into or out of Level 3

During the three months ended March 31, 2025, there were no transfers into or out of Level 3.

- (3) Transfers between levels are assumed to occur at the beginning of the annual reporting period.

- (4) Assets and Liabilities Measured and Reported at Estimated Fair Value at Reporting Date.

When developing estimated fair values, the Company considers three broad valuation techniques: (i) the market approach, (ii) the income approach, and (iii) the cost approach. The Company determines the most appropriate valuation technique to use, given what is being measured and the availability of sufficient inputs, giving priority to observable inputs. The Company categorizes its assets and liabilities measured at estimated fair value into a three-level hierarchy, based on the significant input with the lowest level in its valuation. The input levels are as follows:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for equity securities. The size of the bid/ask spread is used as an indicator of market activity for fixed maturity securities.

Level 2 Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar assets or liabilities other than quoted prices in Level 1, quoted prices in markets that are not active, or other significant inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets or liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

NOTES TO THE FINANCIAL STATEMENTS

Determination of Fair Value

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In most cases, the exit price and the transaction (or entry) price will be the same at initial recognition.

Separate Account Assets: For separate account assets classified as Level 2 assets (excluding derivatives), estimated fair values are determined using either a market or income approach. The estimated fair value is determined using third-party commercial pricing services, with the primary input being quoted securitization market price determined principally by independent pricing services using observable inputs or quoted prices or reported net asset value (“NAV”) provided by the fund managers.

Derivatives: For OTC-bilateral derivatives classified as Level 2 assets or liabilities, estimated fair values are determined using the income approach. Valuations of non-option-based derivatives utilize present value techniques.

The significant inputs to the pricing models for most OTC-bilateral derivatives are inputs that are observable in the market or can be derived principally from, or corroborated by, observable market data.

Most inputs for OTC-bilateral derivatives are mid-market inputs but, in certain cases, liquidity adjustments are made when they are deemed more representative of exit value. Market liquidity, as well as the use of different methodologies, assumptions and inputs, may have a material effect on the estimated fair values of the Company’s derivatives and could materially affect the net change in capital and surplus.

The credit risk of both the counterparty and the Company are considered in determining the estimated fair value for all OTC-bilateral derivatives, and any potential credit adjustment is based on the net exposure by counterparty after taking into account the effects of netting agreements and collateral arrangements. The Company values its OTC-bilateral derivatives using standard swap curves which may include a spread to the risk-free rate, depending upon specific collateral arrangements. This credit spread is appropriate for those parties that execute trades at pricing levels consistent with similar collateral arrangements. As the Company and its significant derivative counterparties generally execute trades at such pricing levels and hold sufficient collateral, additional credit risk adjustments are not currently required in the valuation process. The Company’s ability to consistently execute at such pricing levels is in part due to the netting agreements and collateral arrangements that are in place with all of its significant derivative counterparties. An evaluation of the requirement to make additional credit risk adjustments is performed by the Company each reporting period.

- B. The Company provides additional fair value information in Notes 1, 5, and 16.

⁽¹⁾ Classification of derivatives is based on each derivative's positive (asset) or negative (liability) book/adjusted carrying value, which equals the net admitted assets and liabilities.

Assets and Liabilities

See "A(4) - Assets and Liabilities Measured and Reported at Estimated Fair Value at Reporting Date" above for a description of the valuation technique(s) and the inputs used in the fair value measurement for Level 2 assets and liabilities measured and reported at fair value. Incrementally, assets and liabilities not carried at estimated fair value at the reporting period are described below.

Bonds, Cash, Cash Equivalents and Short-term Investments

When available, the estimated fair value for bonds, cash equivalents and short-term investments are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1, are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

The estimated fair value for cash approximates carrying value and is classified as Level 1 given the nature of cash.

For bonds, cash equivalents and short-term investments classified as Level 2 assets, estimated fair values are determined using an income approach. The estimated fair value is determined using third-party commercial pricing services, with the primary inputs being quoted prices in markets that are not active, benchmark yields, spreads off benchmark yields, new issuances, issuer rating, trades of identical or comparable securities, or duration for Level 2 assets. Privately-placed securities are valued using the additional key inputs: market yield curve, call provisions, observable prices and spreads for similar public or private securities that incorporate the credit quality and industry sector of the issuer, and delta spread adjustments to reflect specific credit-related issues.

NOTES TO THE FINANCIAL STATEMENTS

The estimated fair value for preferred stock is determined using third-party commercial pricing services, with the primary input being quoted prices in markets that are not active. Generally, these investments are classified in Level 2 or Level 3. Preferred stock valued using significant observable inputs are classified in Level 2 and those valued using significant unobservable inputs are classified in Level 3.

For bonds classified as Level 3 assets, estimated fair values are determined using a market approach. The estimated fair value is determined using matrix pricing or consensus pricing, with the primary inputs being quoted and offered prices.

Mortgage Loans

For mortgage loans, estimated fair value is primarily determined by estimating expected future cash flows and discounting them using current interest rates for similar mortgage loans with similar credit risk, or is determined from pricing for similar mortgage loans. The estimated fair values for impaired mortgage loans are principally obtained by estimating the fair value of the underlying collateral using market standard appraisal and valuation methods. Mortgage loans valued using significant unobservable inputs are classified in Level 3.

Contract Loans

The estimated fair value for contract loans with variable interest rates approximates carrying value due to the absence of borrower credit risk and the short time period between interest rate resets, using observable inputs and is classified as Level 2. For contract loans with fixed interest rates, estimated fair values are determined using a discounted cash flow model applied to groups of similar contract loans determined based on the nature of the underlying insurance liabilities, using unobservable inputs and is classified in Level 3.

Other Invested Assets

The estimated fair value of other invested assets is determined using the methodologies as described in the above sections titled "Bonds, Stocks, Cash, Cash Equivalents and Short-term Investments", based on the nature of the investment. Excluded from the disclosure are those other invested assets that are not considered to be financial instruments subject to this disclosure including investments carried on the equity method.

Derivatives

For Level 2 assets not carried at estimated fair value at the reporting period, the estimated fair value is determined using the methodologies described in the above section titled "*Derivatives*."

Investment Income Due and Accrued

The estimated fair value of investment income due and accrued approximates carrying value due as this financial instrument is short-term in nature and the Company believes there is minimal risk of material changes in interest rates or the credit of the issuer. These amounts are generally classified as Level 2.

Investment Contracts Included in Liability for Deposit-Type Contracts

The fair value of investment contracts included in the liability for deposit-type contracts is estimated by discounting best estimate future cash flows based on assumptions that market participants would use in pricing such liabilities, with consideration of the Company's non-performance risk (own-credit risk) not reflected in the fair value calculation. The assumptions used in estimating these fair values are based in part on unobservable inputs classified in Level 3.

Borrowed Money

The estimated fair value for borrowed money (including interest thereon) approximates carrying value due to the short-term maturities of these instruments. The amounts are classified in Level 2.

Payable for Collateral Received

The estimated fair value of amounts payable for collateral received approximates carrying value as these obligations are short-term in nature. These amounts are generally classified in Level 2.

Separate Accounts

Investment contracts included in Separate Account liabilities represent those balances due to policyholders under contracts that are classified as investment contracts. The carrying value of these Separate Account liabilities, which represents an equivalent summary total of the Separate Account assets supporting these liabilities, approximates the estimated fair value. These investment contracts are classified as Level 2 to correspond with the Separate Account assets backing the investment contracts.

The difference between the estimated fair value of investment contracts included in Separate Account liabilities in the table above and the total recognized in the Statutory Statements of Assets, Liabilities, Surplus and Other Funds represents amounts due under contracts that are accounted for as insurance contracts.

- D. At March 31, 2025, the Company had no investments where it was not practicable to estimate fair value.

NOTES TO THE FINANCIAL STATEMENTS

- E. At March 31, 2025, the Company had no instruments measured using the NAV practical expedient for valuation purposes.

21. Other Items

A-B. No significant change

C. Other Disclosures

The adoption of the new principles-based bond definition was subject to special transition guidance in SSAP No. 26. These requirements included the recognition of the disposal of securities reclassified from Schedule D-1 at amortized cost, reporting of such amortized costs as consideration in Schedule D-4, no gain or loss recognition of securities held at amortized cost at the time of adoption, and the removal of unrealized losses associated with securities held at fair value under the lower of amortized cost or fair value measurement method. Securities reclassified from Schedule D-1 were required to be recognized on Schedule BA with actual costs that agreed to the disposal values, and unrealized losses associated with securities held at fair value under the lower of amortized cost or fair value method were recognized to match the previously reported book adjusted carrying value at the time of reclassification. Such recognition prevented the realization of losses at the time of reclassification.

The aggregate book adjusted carrying value for all securities reclassified off Schedule D-1 as of January 1, 2025, was \$6,137,288. Book adjusted carrying value of securities that were previously held at amortized cost and upon reclassification are being held at fair value under the lower of amortized cost or fair value approach amounts to \$1,312,288. The change from amortized cost to fair value measurement resulted in unrealized loss of \$35,162 being recognized in surplus.

D-J. No significant change

22. Events Subsequent

The Company has evaluated events subsequent to March 31, 2025 through May 12, 2025, which is the date these financial statements were available to be issued and has determined there are no material subsequent events requiring adjustment to or disclosure in the financial statements.

23. Reinsurance

No significant change.

24. Retrospectively Rated Contracts & Contracts Subject to Redetermination

A-D. No significant change.

E. The Company is not subject to the risk sharing provision of the Affordable Care Act.

25. Change in Incurred Losses and Loss Adjustment Expenses

A. Reserves as of December 31, 2024 were \$3,242,756. As of March 31, 2025, \$191,463 has been paid for incurred claims and claim adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$3,086,222 as a result of re-estimation of unpaid claims and claim adjustment expenses. Therefore, there has been a \$34,929 unfavorable prior-year development from December 31, 2024 to March 31, 2025. The decrease is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased, as additional information becomes known regarding individual claims.

The \$34,929 reflected in the Schedule involves a change in prior year's reserve in addition to incurred and adjusted claims as of March 31, 2025. This change in reserve does not adjust for accumulated interest as of March 31, 2025. Adjusting the 2024 reserve using an average valuation rate of 3.90% will reflect a more appropriate change in reserve. The adjusted change results in a \$3,728 negative development. This is a negligible negative development.

B. The Company has not made any significant changes to its methodologies or assumptions for calculating unpaid loss liabilities and loss adjustment expenses for the three months ended March 31, 2025.

26. Intercompany Pooling Arrangements

No significant change.

27. Structured Settlements

No significant change.

28. Health Care Receivables
